Index

A

Abrahams, S. See van Eys, J., 375.
Acetate-1-C^{14} and ethanol-1-C^{14}, utilization of by way of citric acid cycle in the rat, 135.
Aging in swine, effect of chronic food restriction, 365.
Agrotis orthogonia Morr., nutrition of. V. Utilization of protein labeled with C^{14}, 333.
Aikawa, Jerry K., Jacqueline Z. Reardon and Dale R. Harms. Effect of a magnesium-deficient diet on magnesium metabolism in rabbits: A study with Mg^{28}, 90.
Algae, various, for growth of rats and chicks, protein value and amino acid deficiencies of, 423.
Amino acid(s) and dietary protein level, influence on plasma cholesterol of growing chick, 321.
— — deficiencies and protein value of various algae for growth or rats and chicks, 423.
— —, dietary, relationship to formation and maintenance in the fowl: protein reserves, 106.
— —, free blood plasma, of swine as related to source of dietary proteins, 11.
— — imbalance, (Sup. 1) 19.
— — in gut contents during digestion in the dog, 131.
— — limiting, sequence in raw and roasted peanut protein, 453.
— —, nonessential, effects on growth of vitamin B_6-depleted rats, 35.
Amprolium. V. Studies on thiamine deficiency in laying chickens and their eggs, 59.
Anderson, Marjorie. See Evans, Robert John, 314.
Anderson, S. C. See Wells, W. W., 41.
Anemia and lysine supplementation (Sup. 1) 23.
"Anemia, meat," in mice, effect of feeding animal tissues on, 298.
Antibiotics, sulfonamides and a nitrofuran, effect of on development of hepatic cirrhosis in choline-deficient rats, 483.
Ascorbic acid, in guinea pigs, catabolism of, a study with ascorbic-1-C^{14}, 493.
Ashida, Kiyoshi. See Muramatsu, Keiishiro, 148.
Atherogenesis in the rabbit, effect of dietary cholesterol, succinylsulfathiazole and mode of feeding on, 41.
Avian disease and nutrition relationships. III. Effect of Newcastle disease virus on nitrogen retention in immature fowl, 86.

B

Baumeimer, Selma L. See Evans, Robert John, 314.
Basson, B. B., W. S. Hartroft and L. Recant. Enhancing effect of aminonucleoside-induced proteinuria on the dietary choline requirement of the rat, 247.
Barry, Thomas A., and Harris Rosenkrantz. The level of isocitric acid dehydrogenase in tissues of vitamin E-deficient rabbits, 447.
Berger, S. See Rechcigl, M., Jr., 435.
Biotin-deficient rats, distribution of serum protein in, 207.
Bosshardt, D. K. See Howe, E. E., 242.
Bozian, R. C. See van Eys, Jr., 375.
Braham, J. E., A. Villarreal and R. Bressani. Effect of lime treatment of corn on the availability of niacin for cats, 183.
Bressani, R. See Braham, J. R., 183.
Bunce, G. E., K. J. Jenkins and P. H. Phillips. The mineral requirements of the dog. III. The magnesium requirement, 17.
Bunce, G. E., Y. Chiemchaisri and P. H. Phillips. The mineral requirements of the dog. IV. Effect of certain dietary and physiologic factors upon the magnesium deficiency syndrome, 23.

C

Calcium and magnesium, serum, depression of in low-magnesium-fed dog, and elevation of blood serum inorganic phosphorus, 17.
—, effect of lysine on absorption of, (Sup. 1) 22.
—, phosphorus and citrate interactions in oxalate urolithiasis produced with a low-phosphorus diet in rats, 385.
Calloway, Doris Howes, Russell Hilf and A. H. Munson. Effects of chronic food restriction in swine, 365.
Caries, dental, and lysine, (Sup. 1) 22.
—, dental, in rats given various diets and water with low concentration of fluoride, 82.
— in the rat, effect of restricting hours of feeding upon, 278.
Casady, R. B., D. O. Everson, W. R. Harvey and A. E. Suitor. Degossypolized cottonseed meal as a source of plant protein in rabbit feeds, 69.
Casein- or soy protein-fed chicks and poults, liver xanthine dehydrogenase and growth in, 475.
Catron, D. V. See Puchal, F., 11.
Chalvardjian, Ara, Lindsay J. Morris and Ralph T. Holman. Effect of dietary epoxyoleic acid upon rats, 52.
Chang, M. L. Wu, and B. Connor Johnson. Metabolism of C^{14}-nicotinic acid in pig and sheep, 512.
Chen, M-L., Q. R. Rogers and A. E. Harper. Observations on protein digestion *in vivo*. IV. Further observations on the gastrointestinal contents of rats fed different dietary proteins, 235.
Chiemchaisri, Y. See Bunce, G. E., 23.
Cholesterol ester, tissue, and triglyceride fatty acid composition of rabbits fed cholesterol diets high and low in linoleic acid, 429.
— -fed rabbits, cholesteryl ester fatty acid patterns of plasma, atheromata and livers of, 219.

— levels, and partial block at isocitric acid dehydrogenase levels, 447.
— metabolism and lactose diets. II. Effect of dietary cholesterol, succinylsulfathiazole and mode of feeding on atherogenesis in the rabbit, 41.
— — — — —. III. Inhibition of cholesterol biosynthesis from acetate-1-C^{14} and mevalonate-2-C^{14} by lactose or succinylsulfathiazole-feeding in the rat, 48.
— — in the diabetic rat, effects of dietary fat on, 460.
—, phospholipid and ketones and hepatic 5'-nucleotidase activity in swine, effect of chronic food restriction, 365.
—, plasma, of growing chick, influence of dietary protein level and amino acids on, 321.
—, serum, and phospholipid values, effect of dietary fats differing in chain length on, 255.
Cholesteryl ester fatty acid patterns of plasma, atheromata and livers of cholesterol-fed rabbits, 219.
Choline-deficient rats, effect of antibiotics, sulfonamides and a nitrofuran on development of, 483.
—, dietary, requirement of the rat, enhancing effect of aminonucleoside-induced proteinuria on, 247.
Chow, Bacon F. See Ranke, Bruno, 441.
Cirrhosis, hepatic, effect of antibiotics, sulfonamides and a nitrofuran on development of, 483.
Citrate, calcium and phosphorus interactions in oxalate urolithiasis produced with a low-phosphorus diet in rats, 385.
Citric acid cycle in the rat, utilization of ethanol by way of, 135.
Coburn, S. P., and L. V. Packett, Jr. Calcium, phosphorus and citrate interactions in oxalate urolithiasis produced with a low-phosphorus diet in rats, 385.
Cold, post-, behavior of riboflavin-deficient rats, 291.
Cook, C. R. See Wells, W. W., 41.
Cook, C. R. See Wells, W. W., 48.
Coon, Edmund. See Wiese, Hilda F., 73.
Corn, effect of lime treatment of on availability of niacin for cats, 183.
Cottonseed meal, degossypolized, as source of plant protein in rabbit feeds, 69.
— oil or *Sterculia foetida*, fatty acid distribution in tissues from hens fed, 314.
Cummins, B. M. See Richmond, C. R., 210.
Cycloacetoacetate, glucose, hydrolized, and penicillin, beneficial role of on thiamine in rats, and the inhibitory effect of sulfaguanidine, 265.

D

Dajani, Rashid M., and James M. Orten. Utilization of ethanol by way of the citric acid cycle in the rat, 135.
Damrongsakdi, Direk. See Follis, Richard H., Jr., 159.
Davidson, J. A. See Evans, Robert John, 314.
Davis, P. N., L. C. Norris and F. H. Kratzer. Further evidence of an unidentified, growth-promoting factor (MGF) in cows' milk, 223.
Dehority, Burk A. See Moore, John E., 414
Dehority Burk A. See Nelson, Eldon C., 325.
Dehydrogenase, isocitric acid, level in tissues of vitamin E-deficient rabbits, 447.
—, liver xanthine, and growth in chicks and poults fed casein or soy protein diets, 475.
De Long, Donald C., John E. Halver and Edwin T. Mertz. Nutrition of salmonoid fishes. X. Quantitative threonine requirements of Chinook salmon at two water temperatures, 174.
De Somer, P. See Evard, E., 219.
Diabetes, effects of dietary fat on cholesterol metabolism in the rat with, 460.
Dystrophy, muscular, and isocitric dehydrogenase in vitamin E-deficient rabbits, 447.
— — — liver necrosis, nonoccurence in young fasting vitamin E-deficient rats, 30.

E

Eicosenoic and erucic acids in adipose tissue in chicks, effect of dietary rapeseed on, 113.
Ellison, Theodore. See Greenberg, Samuel M., 302.
Emerson, Gladys A., Jane B. Walker and Seetha N. Ganapathy. Effects of saturated and unsaturated fats and their mixtures on the lipid metabolism of monkeys, 6.
Enzymes, liver, activity in the rat, effect of dietary protein level on growth and, 148.
Epoxyoleic acid, dietary, effect upon rats, 52.
Ethanol, utilization of by way of citric acid cycle in the rat, 135.
Evans, Robert John, Selma L. Bandemer, Marjorie Anderson and J. A. Davidson. Fatty acid distribution in tissues from hens fed cottonseed oil or *Sterculia foetida* seeds, 314.
Evard, E., J. Van Den Bosch, P. De Somer and J. V. Joossens. Cholesteryl ester fatty acid patterns of plasma, atheromata and livers of cholesterol-fed rabbits, 219.
Everson, D. A. See Casady, R. B., 69.

F

Fat(s) deficiency of dogs, influence of high and low caloric intakes, 73.
—, dietary, effects of on cholesterol metabolism in the diabetic rat, 460.
—, saturated and unsaturated, effects of (including mixtures) on lipid metabolism of monkeys, 6.
Fatty acid(s) and experimental hypocholesteremia in the mouse, 242.
— —, cholesteryl ester, patterns of plasma, atheromata and livers of cholesterol-fed rabbits, 219.
— — composition of liver and plasma lipids in relation to fed and stored fat, 353.
— — composition of sheep tallow, effect of purified diets on, 271.
— — distribution in tissues from hens fed cottonseed oil or *Sterculia foetida* seeds, 314.
— —, epoxy, in rats, 52.
— — of subcutaneous, mesenteric and interscapular fat: changes in tissue lipids in response to diet, 341.

— —, saturated, dog serum lipid responses to dietary fats differing in the chain length of, 255.
— —, triglyceride, and tissue cholesterol ester composition of rabbits fed cholesterol diets high and low in linoleic acid, 429.
— —, unsaturated, and antioxidants, effect on reproduction in the hen, 284.
Fermentation, starch, by rumen bacteria, adaptation of an *in vitro* system to the study of, 414.
Fish solubles and soy growth factors for chicks, 503.
Fisher, Hans. See Shapiro, R., 106.
Fisher, Hans. See Summers, J. D., 187.
Fluoride, low concentration in water, and dental caries in rats given various diets, 82.
— addition to low-magnesium diet, effect on food intake, growth, aortic lesions and aortic mineral, in the dog, 23.
Follis, Richard H. Jr., Kanchana Vanprapa and Direk Damrongsakdi. Studies on iodine nutrition in Thailand, 159.
French, Cyrus Edwin—a biographical sketch, 1.
Fu, Hwei C. See Reiser, Raymond, 215.
Furchner, J. E. See Richmond, C. R., 210.

G

Ganapathy, Seetha N. See Emerson, Gladys A., 6.
Germfree chicks, liver monoamine oxidase and serotonin in, 119.
γ-Globulin absorption in the baby pig: the nonselective absorption of heterologous globulins and factors influencing absorption time, 151.
—, heterlogous, the nonselective absorption of, and factors influencing absorption time in the baby pig, 151.
